FISH

WORKSHEETS

40% of all fish species inhabit fresh water, yet less than 0.5% of the earth's water is freshwater. Tropical fish are one of the most popular pets in the U.S.

CHALLENGES
Lined below are fish species that live in freshwater. Most of the below are cold water.

Salmon
Cown Fish
Flying Fish
Trout
Catfish
Bass
Blue Marlin
Tuna Fish
Shark
Carp

TAKE NOTE!
Fish are cold blooded. Temperature changes affect them. Write your answers.

FACTS ABOUT FISH
A fish is an animal which lives and breathes in water. All fish are vertebrates (have a backbone) and most breathe through gills and have fins and scales.

- Fish make up about half of all known vertebrate species. Fish have been on the earth for more than 500 million years. Fish were well established long before dinosaurs roamed the earth.
- The 25,000 known species of fish are divided into three main groups. There are three classes of fish: jawless, cartilaginous, and bony. All fish have a backbone.
- It is estimated that there may still be over 15,000 fish species that have not yet been identified. There are more species of fish than all the species of amphibians, reptiles, birds and mammals combined.
- Some fish like sharks don't possess an air bladder to help buoy them. Some species of fish can fly (glide) others can skip along the surface and others can even climb rock.
- Fish have a specialized sense organ called the lateral line which works much like radar and helps them navigate in dark or murky water.

Diary Entries

Dear Diary,

16/5/1760

I had another hard and long day at work. Today I had to work 12 hours with only one hour break. Working for this long in a factory at nine years old is just way too hard but I must help my poor family with whatever money I can raise. I do the work of a man but only get paid 1/8th of his salary. Working in the textile factory is not what I want to do, I would much rather be playing with my friends.

I am still in shock from what happened to Johnny today. Johnny was cleaning underneath the machine that spun cloth like I had seen him do a hundred times before, it can be a fire hazard if the threads and lint aren't cleaned out through the day. The company doesn't want to lose money by stopping production and turning off machines while this job is done, so Johnny just crawls underneath while they are running. This time though his pants got caught on one of the wheels and it pulled him right into the machine, he screamed but the noise from all those working machines was too loud for anyone to hear him in time. He was crushed right in front of my eyes. Johnny was an orphan, he was only a year older than me and didn't get paid. He was told his food and board was his payment but they never feed him much as he was so thin. No one will care that Johnny was killed, except me and I bet tomorrow another orphan will be crawling right under where he was killed, the machines must go on.

Hopefully tomorrow will be a better day,

Billy
