28 February 2012, 2:19 PM UTCBY Rosa Goljansam Spratt/ Hojeyou probably saw many versions of the Twitter bird logo now, but did you know that the little guy actually has a name? He is. © Larry! Larry the Bird.um Tweet by Ryan Sarver, a Twitter worker working on the platform and the company API reminded us of this piece of trivia. Sarver tweeted that Doug Bowman- creative director of Gunshot discussed "Larry's evolution the bird logo" on Monday. Twitter/ the Tweet today doesn't mark the first time we heard someone else's logo on Monday. © Reference to Larry's name. When Twitter challenged its users to try to design the Twitter bird logo better than today Ann Curry in 2011's title, a hashtag #5sketchard was used. Twitter today, how did Larry get his name? He is. © nominated after Google Co-founder Larry Page? Or maybe after Larry the cable guy? Maybe Larry King? No, Larry the Bird. © Named after former NBA basketball player Larry Bird of Boston Celtics fame. This detail was confirmed when Peter Stringer "Interactive Mother Director of Boston" asked Twitter Co-founder Biz Stone about it in August. 2011 Twitter/ Say Reported Stories: You want more news so far © Technics, silly exchanges or funny links? You will have many three if you continue with Rosa Golijan, the writer of this post, following her on Twitter, signing up for her Facebook post s, or circulating her Google+. If you're more interested in Sam Spratt "The guy who did the cute picture of the Twitter bird above" then you'll want these on Facebook, "Tumblr Links". The Social Security Administration (SSA) compiles a list of the most popular baby names in the last hundred years. This is perhaps the most complete picture of the most common names in the United States. The following list includes male and female names from 10 to 1 as well as the most common surnames based on the 2010 census. In 2010, 1,060,159 people in us had the last name last name This was the dud © Last name most common in the country. Meanwhile, the give © Most common name in the last hundred years has been Charles (2.144.937 or 1,23% of 173.916.919 born masculine) and Margaret (993.136 or 0,59% of 169.671.039 born female). The ninth most common surname also © I was Hispanic. There were rods in 2010. And of all babies born between 1918 and 2017, 2174.023 were thomases. A total of 996.554 girls were named Sarah. Two common names/are Amman's eighth most popular © rich; Josiah © Public and Jessica. These accumped for 2.384.205 and 1.043.436 baby names respectively. Meanwhile, in 2010, 1.116.357 people had the last name Davis. An amount of 2.487.983 Richards is equivalent to 1,43% of all babies born between 1918 and 2017. The 1.106.071 Susans represent 0,65% of the baby's total births. As for Millers, there were 1.161.437 of those recorded in 2010. Another Spanish surname comes in number six. There were six.166.120 rallies in the 2010 census. But not really. © Last century, there were over three.57.293 Davids and over one.410.059 Barbaras. Love them or hate them, the British royal family has been the inspiration for the names of babies. There were 3.662.399 Williams born between 1918 and 2017 and 1.443.415 Elizabeths. Good luck keeping up with the Joneses, though. There was one of those in 2010.425.470. The fourth most common surname in 2010 was Brown, with 1.437.026 occurrences. Michael and Linda were the fourth most common names of the healthy © before 2018. They had 4.315.462 and 1.448.097, respectively. Robert and Jennifer are very versatile names. Shortcomings include Rob, Bob, Robbie, Bobby and Jen, Jenna, Jenny and Jennie. That might be why they're s o popular. Of all the boys born in 1918-2017, 4571203 (2,63%) were called Robert, while 1.465.928 (0,86%) of all the girls were called Jennifer. 1.625.252 People had a last name In 2010. Okay, so you can not find many John Johnsons; But the two get the second place. A total of 2.64 percent of the boys (4,594,023 born in the last season) was given the name John, and the last census registered 1,932,812 supernomes like Johnson. A 1,564,163 Patricias (Pat, Patty, Trisha, Trixie) represent 0.92 percent of all female births between 1918 and 2017. No surprises: Smith is by far the most common name in the US. In the 2010 Census, 2,442,977 of them were counted. James and Mary are the first most common names. But as long as there were only 198,931 more James than Johns born 1918-2017, there were 1,829,293 more Marys than Patricias. The three, 393,456 fondsmas called Mary Accounted for two percent of all child births. Silver Leapers / Flickr / DC by 2.0 Common Name: Bohemian Waxwingan Scientific Name: Bombycilla Garrulus The Waxwing Bohn is common in the winter in the northwest and northern rocky mountain regions, although in irruption years these colorful birds may appear in Any North Region. Often confused with their most common cousins, the waxwings cedar, good waxwings are slightly larger and they have low ferruginous covers, a wash in the face, and a gray and abdomen thorax instead of the brighter yellow marks of the wax of cedar. These birds will anxiously cluster into fruit trees in winter, and also dip in the snow by water. Backyard birds can attract them in large numbers, offering a heated bird bath for liquid water in winter. Continue to two from 12 below. William Klos / Flickr / DC by 2.0 common name: Northern Cardinal Scientific Name: Cardinal Cardinal is The Northern Cardinal is one of the most popular winter garden birds. Although these brave red birds are common throughout the east of the United States all year, they are particularly welcome in the winter. Its bright plumage is an impressive ornament for a landscape without And even the most pale plumage of the figure is attacking against his red law and red dish marks. Red. Birds prefer black-oil sunflower seeds and air seeds, although in winter they too © m are partial to weaving blocks with mixed seeds and fruits. The cardinals of the north also © They will appreciate a heated bird bath for the water of winter. Continue until © Three of 12 down. Andy Reago & Chrissy McClarren/ Flickr / CC by the common name 2.0: American Robin Scientific Name: Turdus migratorius Many people consider the American robin to be one of the early spring birds. In fact, these birds can be residents all year round in the United States if food supplies are plentiful and snow cover is not © Very deep. Although they are migratory throughout Canada, too © They will remain in parts of this summer range, if the conditions are right. At the height, American troops will take advantage of the birds/baths, no matter how cold it gets. Offering fruit in food or leaving fruit in trees all winter will provide a favorite food source. Continue until © 4 of 12 down. Steve Voght / Flickr / CC by-SA 2.0 Common Name: Red-Breasted Nuthatch Scientific Name: Sitta canadensis The red-breasted nuthatch © one year of residency around Canada and the western mountain regions and the upper Appalachian mountains of the United States, but can be found in all the United States in the winter months. Easily recognized for its audacious striped head and the red bath on its flanks, this nuthatch © Active and joyful, and will easily visit seed eaters and blocks of suet on porches. Very brave birds, not afraid of humans and can even © be hand-fed by patient birds. Continue until © five out of 12 below. NancyM / Flickr / CC by 2.0 Common Name: Scientific name Tufted Titmouse Scientific: Baeolophus bicolor The most familiar Titmouse, tufted titrate © common in the Eastern United States throughout the year, but they are more likely to visit feeders in the Winter, where they prefer seeds, broth and peanuts. These are also brave birds that can be fed to the hand, although the Western titchongs for nothing. Toa. Western variations are also less widespread, but still visiting feeders regularly. Continue to six from 12 below. Sandy Stewart / Flickr / Used with Permission Common Name: Dark-Eyed Junco Scientific Name: Junco Hyemalis The dark-eyed reed is so popular in winter that is often called "snowbird". In fact, there are several plumage variations of dark-eyed reeds, and Oregon's dark-eyed junco shown here is the most populous in the West. The clear color bird is the most popular dark-eyed reed in the east of the United States. It does not matter what kind of dark-eyed reed visits your feeders, however, your white millet is your favorite food, and they prefer it from earth eaters or low platforms. Continue until 7 of 12 below. Jassen / Flickr / DC by 2.0 Common name: Downy Woodpeckerscientific name: picoides Pubescens The smallest North American woodpecker, the woodpecker is common in all the United States and Canada all year round. However, these birds will visit feeders with more frequently in winter, especially for meat blends. Yard birds can make your own simple weaver revenue with sunflower seeds or mixed millet. Leaving stems of weeds and sunflowers in the winter It will also attract these birds, and they will also use the bird rooster boxes on cold nights. Continue to eight from 12 below. Craig Nash / Flickr / Used with Permission Common Name: Snow Bunting Scientific Name: Plectrophenax Nivalis Nesting in Anastic Regions, Snow Bunting Migrates to pass winters in the southern Canadian and northern United States. Easily recognized with its white plumage and rusty collar, these birds can form large, active, hungry flocks while visiting feeders for different seeds, particularly white millet and sunflower seeds offered on the ground or low platforms. They will float in the snow to of winter, and until © same nel for snow for the warmth of the rooster. Garden birds can encourage snow buntings to visit not only with the proper food, but also © m per Shrubs low and brushed to provide attractive areas. Continue until 9 out of 12. Jim Peco / Flickr / Public Dominion Mark 1.0 Common Name: Mountain Chickadeescientific Name: Poecile Gambeli Chickadees of all varieties are resident throughout the year in its specific bands, and the mountain Chickadee is common in the Western mountainous regions, particularly in the Concomer forests. The chickens will visit the bird eaters for sowing and mixtures of catfish, and in fact the chickades are some of the most accommodating winter birds to attract. Black Hooded Chickadee, the most common Northern Chickadee as well as Carolina Southeast Chickadee, also visiting Paines for similar foods. All these live birds will run into trees with fast pederners and branch jumps in branch. Continue to ten from 12 below. Melissa mayntz / used with the common name of the permission: California Quails scientific name: Californica Callipepla California Quail California is a common terrestrial bird during the year in the northwest of the Pacific and throughout the Western Region of the United States. In winter, they can be found in large flocks foraging in fields and visiting feeders where seeds spill on the ground. At night, these birds will embrace on a tight perch to save the heat, increasing their feathers to make their fleshy bodies even more rounded. Provide the right food and sufficient shelter is fundamental to attract backyard quail in summer and winter. Continue until 11 of 12 below. Nick Saunders / Flickr / Used with the common permission name: Pine Siskinscientific Name: Cartuelis Pinus Pinheiro Siskin is a North Ave that reproduces in the Central Canadian. While its winter mountain range is usually restricted to the southern Canada and the northern end of the United States, this small tenthãon has great years of irruption when populations can spread to the south to the Mexico. These birds often big flocks and they will blend with American goldfish and smaller goldfish. They can be bullies at Nyjer feeders, however, as they protect their favorite seed with Exhibitions of holding bills and spreading wings and tails. Proceed to 12 from below. Dave Walker / Flickr / CC by 2.0 Common Name: Sparrow Scientific House: Passer domesticus The sparrow from the house to the sparrow. © a common and familiar round of birds throughout southern Canada, the United States and Mom © xico, and they bring the behavior of living flocks to © even for the most isolated winter eaters. They will gladly eat a variety of seeds, but black oil sunflower seeds, sunflower hearts and millet are preferred, either from the platform or jumper eaters. Piles of brush, pines and shrubbery are also low © are favorite roosters, and these birds will snuggle in cold winter evenings to conserve heat. Some birds, however, prefer to discourage domestic sparrows. © Statistics because they are a species © rich in the North and can be brave for native birds. Birds.
