BAB I

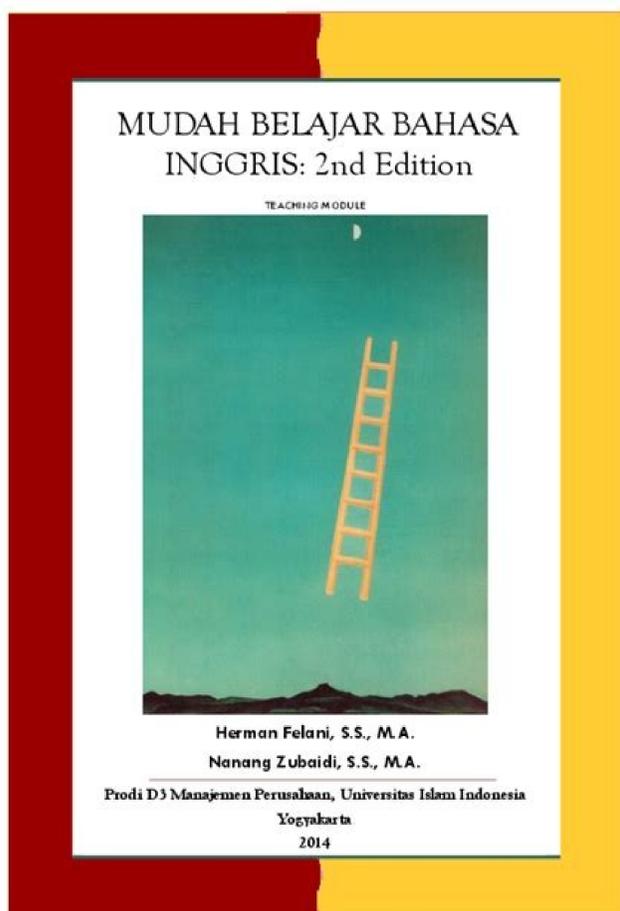

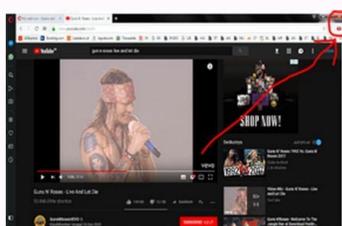

PENDAHULUAN

A. Latar Belakang Masalah

Gitar adalah alat musik yang akan menghasilkan suara tertentu bila senarnya dipetik. Suara tersebut akan menjadi nada pada frekuensi tertentu. Nada E pada senar gitar pertama *fre* nol berada pada frekuensi 329.63 Hz dan pada senar ke-enam *fre* nol berada pada frekuensi 241 Hz (DK Basuki, 2009). Gabungan beberapa nada akan menghasilkan *chord* yang harmonis.

Terdapat beberapa hal yang perlu diperhatikan dalam membawakan sebuah lagu, salah satunya adalah ketepatan dalam penggunaan nada atau *chord*. Terkadang pemain musik merasa kebingungan untuk mengetahui *chord* apa yang digunakan dalam lagu. Terutama bagi pemusik pemula. Maka dari itu diperlukan solusi – solusi untuk mengetahui *chord* yang digunakan dalam suatu lagu.

Terdapat beberapa cara untuk mengetahui *chord* apa saja yang digunakan dalam suatu lagu. Pertama adalah dengan mencari daftar *chord* pada lagu yang tertulis dalam tulisan di internet atau buku. Kedua adalah dengan insting. Apabila telah menekuni bidang musik cukup lama maka tidak akan mendapat banyak kesulitan dalam menemukan *chord*. Ketiga adalah dengan bantuan *software*. Melalui yang berjudul "Pemrosesan Sinyal untuk Menghasilkan *Chord* pada *Software* DMM 2.5" merupakan salah satu solusi dari permasalahan di atas.

Free download lagu no copyright. Is no copyright sounds free. Where to get copyright free music. Free download lagu no copyright sound mp3. How can i get a free copyright. Is copyright free music free. Is no copyright music free.
