Shop Spindles Stages Cycling BB spindles are available in six options: A) SRAM Red 22 BB30 B) SRAM Force 22, Rival 22, Force/Rival CX1 C) 2015MY SRAM BB30 mountain cranks - 9mm spacer\* D) 2015MY SRAM BB30 mountain cranks - 15.5mm spacer\*E) Race Face Next SL - 168mm q factorF) Specialized S-Works Road - 2017/2018MY G) SRAM DUB MTB This website uses cookies to ensure you get the best experience on our website. Learn more. I am trying to install SRAM Eagle GX dub groupset (and new wheels) on Merida big.nine 2015 29er.Since it has 68mm bottom bracket, I used (according to the table on p.6 of ) two 2.5mm inner spacers on both sides and inserted a 4.5mm outer spacer till the satisfying "click" into the right cap of the bottom bracket.Then I've installed cassette and derailleur, and put a chain onto the largest cog, with result looking like this: chain seem to come to the cog at extreme angle (though I've never seen SRAM Eagle drivetrain from this angle), and even small amount of back-pedaling results into chain slipping from the cog.Should it look like this and are all BSA-68mm bottom brackets equal, or I might need to rearrange spacers in a way that shifts the chainring towards the frame?Page 2 9 comments
