

How to hard reset your phone

Continue

If your iPhone 13 becomes unresponsive and you can't shut it down using the normal methods, it's time to try a forced restart—sometimes called a "hard reset" (which is not to be confused with a factory reset). Luckily, it's easy to force your iPhone to restart using just three button presses. Here's how. What Is a Forced Restart? A forced restart will force your iPhone to power off and restart without the typical shutdown process. Shutting down the usual way is important because it tidies things up before powering off your iPhone. But if your iPhone becomes unresponsive, sometimes you're forced to take a more drastic step by forcing a reboot. Be advised that a forced reboot should only be used rarely. Using a hard reset regularly may cause problems with your iPhone. Your iPhone should be shut down gracefully unless it's frozen or otherwise unresponsive. How to Force an iPhone 13 to Restart To perform a forced restart on your iPhone 13, you'll need to do three button presses in rapid succession. On the last button press, you'll need to keep holding the button. Here's the recipe: Press and release the Volume Up button, press and release the Volume Down button, then press and hold the Side button. Keep holding the Side button until you see an Apple logo on the screen. When the Apple logo appears, you'll know that you performed the button combination properly. If it didn't work, try it again—it can be kind of tricky to get right. Once you're on the Apple logo screen, your iPhone may take longer than usual to start up. That's normal. After a moment or two, you should see the lock screen like you usually would. RELATED: How to Force Restart Any iPhone or iPad Further Troubleshooting Tips If the hard reset didn't help, you may need to put your iPhone into recovery mode and reset the iPhone using iTunes or Finder. In the future, remember to perform regular backups of your iPhone data so you don't lose it. Also, you might want to consider why your iPhone froze up to begin with. If it happens regularly, it might be a sign of a recurring bug or a hardware problem. It's good to update your iPhone to the latest version of iOS in the hopes that a bug fix might solve your issues. If all else fails, you can always contact Apple Customer Support for advice about the repair or replacement of your device. Good luck! Want to use your phone as a flash drive? Want to pull your photos and videos off, or maybe load it up with music? You can do all of that by plugging it in, and setting it in USB storage mode. This varies slightly from phone to phone, but the principal is the same. You plug your phone into your computer and tell it to "turn on USB storage" or "Mount as disk drive." The examples above are from stock Android 2.2 on the left, and HTC Sense on the right. Your phone might ask you which mode you want when you plug it in, or you might have to pull down the notification shade (grab the top bar and swipe down), and from there you can mount your phone as a drive. You might actually get a second drive if you have a phone like the HTC Incredible, which has extra internal storage in addition to the SD card. If you're trying to track down your photos, look for a folder called DCIM. Another tip: When you're done, be sure to "eject" the drive from your computer before pulling the cable on the phone. Tuesday September 13, 2022 11:55 am PDT by Sami Fathi Apple this week released iOS 16, the latest version of iOS with a new customizable Lock Screen, major new additions to Messages, and enhancements to Mail, Maps, and more. Other than the headlining features, there are a number of quality-of-life changes, improvements, and new capabilities baked into iOS 16 that help improve the iPhone experience. We've listed 16 hidden features and changes... There are many different kinds of resets: a restart, a hard reset, resetting device settings, and resetting to factory settings. Use different resets to solve different kinds of problems. "Reset" is another way of saying "restart" in some cases, so if you know how to restart iPhone 12, you know the basics of resetting, too. There are many kinds of problems that can be solved when you reset the iPhone 12. This article explains the major different types of iPhone 12 resets and how to do them. As mentioned above, "reset" is another term for restarting an iPhone. If you want to reset iPhone 12, follow these steps: Press the Volume Down button and Side button together. When the slide to power off slider appears on the screen, let go of the Volume Down and Side buttons. Slide the slide to power off slider to shut down the iPhone. Wait about a few seconds for the iPhone to turn off. Once the iPhone is off, wait a few seconds and then press the Side button again. When the Apple logo appears, release the Side button and the iPhone 12 will restart. Hard reset iPhone 12 when your iPhone won't respond to the standard reset steps or if you need to solve more persistent problems. Here's how: A hard reset is sometimes also called a force restart. Press the Volume Up button and release it. Press the Volume Down button and release it. Press and hold the Side button (ignore the slide to power off slider). When the Apple logo appears, let go of the Side button.

Wait for the iPhone 12 to restart. Your iPhone 12 contains all sorts of settings related to Wi-Fi, cellular networks, and connected Bluetooth devices, as well as your preferences and settings for how your iPhone is personalized to you. To solve some problems, you may need to reset those settings. To do that, go to Settings > General > Reset. From that screen, your iPhone 12 reset options are: Reset All Settings: Returns all of your settings to the defaults. It won't erase any apps or data. Erase All Content and Settings: Deletes all of the data on your iPhone. This includes all preferences and settings, and every song, app, photo, movie, or other file on your phone. Reset Network Settings: Returns wireless networking settings to the factory defaults. This includes Bluetooth devices and Wi-Fi passwords. Reset Keyboard Dictionary: Removes any custom spellings and words you've added to your iPhone's dictionary. Reset Home Screen Layout: Undo all of your custom iPhone folders and app layouts you've made so your home screen returns to the default. Reset Location & Privacy: Removes all location and privacy settings so that apps that need to use your GPS location, address book, microphone, or other private data have to ask permission again. If you want to return your iPhone to its brand-new state, the way it came out of the box, you need to factory reset iPhone 12. You should do this before sending your iPhone in for service or selling your iPhone, or when you need to solve a problem by deleting all of your data and settings. Here's how to factory reset iPhone 12: The most important thing to do before factory resetting an iPhone 12 is to back up your data. A factory reset erases all data, so it's crucial you back up that data so you don't lose it. Begin by turning off iCloud and Find My iPhone by going to Settings > [your name] > Sign Out. If you don't do this, your iPhone 12 will be Activation Locked to your Apple ID. Once he signing out is complete, tap < Settings in the top left corner to return to the main Settings screen. Tap General. Scroll to the bottom of the screen and tap Reset. Tap Erase All Content and Settings. If prompted, enter your iPhone passcode. A pop-up window warns you that this step will delete all music, other media, data, and settings. Tap Erase to continue. Wait a minute or so for your iPhone to delete everything on it. When your iPhone restarts, it has been reset to factory settings. FAQ How do I perform a hard reset on my iPhone 12 Pro Max? To hard reset an iPhone 12 Pro Max, press and release the Volume Up button > press and release the Volume Down button > press and hold the Side button until the Apple logo appears. How do I turn off my iPhone 12? Press and hold the Side button and Volume Up or Volume Down button. Then, at the at the top of the screen, move the Power slider to the right to power off the iPhone 12. How do I close apps on my iPhone 12? To close apps on the iPhone 12, start by swiping up from the bottom of any screen to view all open apps. Then, swipe right and left to find each app you want to close. To close the app, swipe up and off the top of the screen. There is no way to close all apps at once. Thanks for letting us know! Get the Latest Tech News Delivered Every Day Subscribe Tell us why!
