K & Us Equipment

Sartorius analytical balance a200s manual. Sartorius cp225d analytical balance manual. Sartorius analytical balance user manual.

Benchtop Lab Equipment General laboratory equipment and instruments are the workhorses of the lab; they are the backbones that make running tests, performing experiments or doing research all possible. At LabRepCo, we understand the importance of having high performance equipment that produces accurate results, which is why we offer an extensive selection of innovative, high-quality general lab equipment and instruments that are essential within any laboratory. Our reliable systems are simple, yet efficient solutions designed to handle all of your daily routine lab applications. Our basic lab equipment features a long-lasting design with rugged construction, easy operation with user-friendly controls, and innovative technology for outstanding versatility. Whether you're looking for hot plates and stirrers, homogenizers and cell disruptors or shakers, mixers and rockers, we have the right solutions to meet your application, lab space and budgetary needs. Cell Culture Equipment Cell and tissue culture is the process of removing cells or tissues from humans, animals, plants, fungi, microbes, etc. and growing them in an in vivo controlled environment. These processes require a clean, safe environment free of contamination for both researchers and the samples being cultivated, which is why we strive to provide our customers with a product selection that offers just that. We specialize in a complete line of innovative cell culture equipment designed for any tissue culture application including cellular and molecular biology, tissue engineering, drug screening and development, and large scale manufacturing of biological compounds such as vaccines. Included in this product offering are biological safety cabinets, incubators and centrifuges from NuAire, liquid nitrogen cryogenic storage tanks from Taylor Wharton and Chart MVE, scales and balances from Sartorius and Torbal, and water purification systems from Millipore, LabStrong Corp and Agape Water Solutions. To keep all of your lab supplies clean and contamination-free, we offer glassware washers from Lancer, autoclaves from Amerec, and sterilizers from Getinge. All of our cell culture equipment provide consistent, reproducible results for proper cultivation, incubation and preservation of cells. Cold Storage Equipment Laboratory cold storage provides secure and reliable preservation of sensitive samples. Our offering includes Ultra Low Temp Freezers, Lab Refrigerators, Lab Freezers, Cryogenic Sample Storage, Freezer Racks, Temperature Monitoring and more. From our very own line of LabRepCo Ultra & Futura series of refrigeration to Panasonic TwinGuard & VIP ULT Freezers, we offer a variety of options to accommodate any laboratory storage requirement in temperatures ranging from +4°C down to -196°C. All of our units are designed and constructed with state of the art engineering and materials to ensure maximum sample protection and superior reliability, exceeding FDA qualifications and validations for the pharmaceutical industry and CDC requirements for proper vaccine storage. Click here for Medical Cold Storage Instruments The proper care and well being of laboratory animals is of top concern among researchers and animal caregivers today. Choosing the right equipment to provide unsurpassed protection to the animals and the individuals conducting the research, as well as providing ergonomic benefits, is an important decision discussed in many laboratories. Concerns regarding adherence to decontamination guidelines, proper ventilation, allergen control and safety are all components of the evaluation process and are extensively examined. LabRepCo takes all of these concerns into consideration when helping you choose the best solutions for your Vivarium. Over the past few years, LabRepCo has developed a full product offering of the most innovative equipment to house, handle and care for animals and protect the researcher. Seating, Storage & Furniture Laboratory Furniture and Storage Solutions provide the desired durability, flexibility and comfort that enable laboratory researchers to effectively and efficiently complete their day-to-day tasks. Our catalogue includes laboratory carts, shelving, tables and storage systems; a wide range of chairs and stools to meet your ergonomic needs and specifications; Mobile and fixed casework and workstations; and Storage Cabinets for hazardous materials such as Acid and Flammable products. If your needs require a customization beyond our standard furniture and seating products we will assist you in designing a system that will work most effectively for you. Adoption of data-intensive analytical approaches such as the use of spectroscopy and multi-omics "big data" in the pharmaceutical industry and elsewhere presents significant challenges when it comes to analysis and interpretation. SIMCA® Omics and Spectroscopy skins are designed to streamline analysis and use of advanced analytics such as OPLS and O2PLS so that you get reliable and actionable results more quickly and easily. 150 Sartorius . . . . . Copyright © 2020. Sartorius. All rights reserved. Page 2 Copyright © 2020. Sartorius. All rights reserved. Clearance Item: GTSQG-MINI80E: Kurabo QuickGene Mini -80 E Purification Manifold suitable for 8 samples per run Normally: \$1,2500 Ex-GST Now: \$700.00 Ex-GST, 1 left at this price! This medical grade undercounter refrigerator optimised safe storage thanks to its double glazed glass panel that provides users full interior visibility. This Pharmacy Guild approved Medifridge allows for safe temperature control on all shelves for storage of vaccines, vitamins, and other sensitive products. Rainin's Pipet-Lite PL is one of the most ergonomic universal-fit manual pipettes available. Accurate and precise, Pipet-Lite PL delivers light and smooth operation, even after hours of pipetting. Now also available in LTS tip format. OHAUS Precision Balances fall into three distinct ranges with features to suit users specific requirements: EXPLORER range is Intelligent, Intuitive and Ingeniously practical. ADVENTURER range is the MOST Complete Balance in its Class. PIONEER range is the Best Balance for Basic Weighing. (Note: Please indicate CAT# when requesting a quote) CLICK HERE FOR... Masterflex peristaltic pumps serve a variety of markets from laboratory applications to process engineering to heavy-duty production and manufacturing. In all, you'll discover pumps that are accurate, durable, and easy to use. Each component is designed to strict standards and rigorously tested to ensure precise flow delivery. The Labform peristaltic pump range is widely used in laboratories where liquid is to be transferred quickly and accurately. Applications include: cell culture media transfer, chromatography, wastewater treatment, chemical reagent dosing and filtration processes. Porvair Krystal series clear bottom plates are now recognised as industry-leading tools for Pharma drug discovery and screening. The degassers can be employed in all type of applications where gases dissolved in the operating liquid may interfere with the use of the system. Degassing is an absolute requirement to get optimal performance out of your analytical instrumentation or chromatography system! The use of a BIOTECH DEGASER system will save you time and money by avoiding... The next step in the evolution of OHAUS' original Starter Series. Biosan UV-Cabinets for PCR operations are designed for clean operations with DNA samples. They provide protection against contamination. All models are bench-top type, made of metal framework, glass (or plexiglas) walls and working surface painted with powder enamel or made of stainless steel. Bio Cabinets Safehoods are the latest fume cabinets with activated carbon filters for the removal of a variety of toxic fumes, gases or vapours from the exhausted air. (Note: Please indicate CAT# when requesting a quote) Rainin Pipette Lite pipettes feature low tip sealing force, 30% reduction in pipetting force compared to traditional pipettors, light weight rugged body, rapid volume adjustment via digital volume adjustment and a quick release tip ejector. RAININ XLS+ Manual pipette with RFID. The Performance Champions. Bromic's Ice machine range features both self-contained and modular units, operating across a range of production rates and ice styles to provide the perfect solution for any application. (Note: Please indicate CAT# when requesting a quote) When laboratory work and research requires accuracy to the hundred-thousandth, there is simply no room for error. The Explorer series of semi-micro balances has been designed with the technology to ensure that your very specific weighing results are accurate. (Note: Please indicate CAT# when requesting a quote) CLICK HERE to download Balance Software and... Several models are available (See below and brochure). Current Special! IECCH2092-001 Magnetic stirrer/hotplate, Max 320oC, 18x20cm Aluminium hot plate, Thermostatic dial control, Max. H20 stirring quantity 2.5L with 60mm pivot stir bar. Special Price! \$440.00 Ex-GST Microelectrodes, Inc. fabricate unique, reliable microelectrodes for pH, Oxygen, Carbon Dioxide and Ions. Their products are used by students and scientists worldwide. Sartorius supplies a wide range of individual filter papers, microporous membranes, filtration devices, ultrafiltration devices and protein purification devices to suit a range of environmental, chemistry and bio scientific laboratory applications. The Bio-Link BLX Crosslinker is an UV irradiation system, mainly dedicated to the linking of nucleic acid to membranes and elimination of PCR continuation. Its innovative design includes a programmable microprocessor, precise irradiation in either energy (joules/cm<sup>2</sup>) or time (seconds), and spacious UV exposure chamber in stainless steel. Eutech offers a comprehensive range of laboratory and field instruments for electrochemical and photometric water analysis. Eutech also manufactures continuous on-line process instruments for the monitoring and control of pH, Conductivity, Total Dissolved Solids (TDS), Redox Potential (ORP), Dissolved Oxygen (DO) and other water quality parameters. The quality, design and innovation of the superior performance refrigerators and freezers guarantees the safe and effective storage of valuable samples and reagents. Warranty, 5 years parts & labour! 2021-07-09 12:38:58 2021 New Products! See news letter attached. Read More 2021-07-02 09:25:26 Adalab Scientific is 35 years old! We are proud to have supported the science community across Australia, although principally in South Australia, with quality products that have contributed to their research and on-going development. We are grateful for the support we have enjoyed from our many customers and look forward to continuing to work with you all in the future. Analytical balances are the most used balances in a laboratory. They have a maximum weighing capacity between 60 g and 520 g, coming with a readability of 0.1 mg they are commonly used for weighing small samples. Sometimes lab balances with a readability of 0.01 mg or 10 µg are also called analytical balances. Apply the Power of MVDA to Multi-Omics "Big Data" and Spectral Analysis Adoption of data-intensive analytical approaches such as the use of spectroscopy and multi-omics "big data" in the pharmaceutical industry and elsewhere presents significant challenges when it comes to analysis and interpretation.
