See our disclosure page for more information. The foundation of each house gym is literally what is on the ground. I bought and tried some of the best gym floor options at home (as well as some dark mats) to determine what works best for most people's majority. The thing is that there are no equal home gyms. Some people raise weights in the garage, some make yoga in the hall, some make an upstairs bedroom in a high intensity cardio studio. If the Outbreak Covid-19 had some effect on fitness, it was the gym increase at home. Like most health clubs and closed gyms, creating a training environment at home did not become a luxury, but an important option for desperate athletes. Even when there are more space available, many of us are still loving our new home training routines. There are a number of different options for the diy fanatical home gym. I'm going to break the best gym floor carpets, tiles, and even vinyl planks so you can determine what works best for your training space. You could be using a yoga mat or any floor you have in your home right now, depending on your configuration. However, if you really want to improve your gym area at home, investing in a new gym floor can significantly improve your training results. The 7 best options for the dumb floor at home My Top Pick: Tractor Supply Rubber Stall Mats Tractor Supply 3/4 "Good by: Any gym in a basement, garage or even outdoor my favorite features: great durability for any exercise Non-slip surface Good reduction For fallen barbells Less than \$50/foot (less than \$2/square)Five-year warranty from Tractor Supply My Callouts: Heavy, weighing around 100 pounds per piece Some people don't like the rubber smell The surface is not smooth; these have increased the blows It can be harder to clean than smooth surfaces The absolute basic for most of the houseThe floors and especially the garage gyms, the world, is located on the mat of the horse stand. For most people, the easiest and cheapest place to buy them is tractor supply. You can order online or just go to the store to pick them up (as long as your vehicle is large enough to transport them). These horse hills from the tractor supply use recycled rubber, are 3/4" thick, 4 1/4m 6" in size, and weigh 100 pounds. You can find horse mats in other agricultural supply shops, and they will be similar in dimensions. The thickness makes this floor sound absorbing. These mats support literally any exercise: whether you're on PowerLifting or CrossFit, using power bars or crossfit bars for dead lamps, squats, bench press, cleaning and shaking, siting, etc. These mats support literally any exercise. Related: Better weight benches at about 100 pounds Each, the mats themselves can move, but may require more than one person, just depending on their strength. A hundred pounds doesn't seem like much, but it's a strange object, so it can be a little clumsy. However, these are relatively easy to cut to accommodate strange dimensions and small sizes. It is important to note that these do not have a smooth surface. That may be ideal for your grip, but some people find it harder to clean. In addition, horse mats are notorious for the um, funky rubber smell. I, personally, don't care because that's what I smell like a garage gym, but keep that in mind when choosing this option. The best interlocking tile floors: American floor mats in the form of blocking rubber locks American floor blues Lace suitcases Rubber tiles Good for: Small spaces and people who want color options My favorite features: \$ for a piece of 2 @ x 2 ', which is A little bit more than \$ 2 / Square Footbots on a variety of heavy duty rubber lights from ColorSthick, well and kept on PageReasy to configure, easy to move my calls: a little more expensive than the Matsnot stand so thick, but you should still to protect the bases illegally illegally illegally Labour-intensive that just throw away the large carpets affordable and ideal for smaller spaces, the rubber floor of the American floor platform. The brand essentially took its rolled up mat and cut them into nailed floor tiles, the way they make many foam mats. These are thick, which are a little thinner than horse mats, but still strong enough to withstand the heavy lifting. This is a great looking option. The tiles are available in a variety of stain colors: black, blue, red, grey and tanned. The centre, the corner and the border pieces perfectly combine a square or rectangular space. If you have an odd shape configuration, these gym rugs are easy to cut. Unlike riding mats, the adjustment locking tiles have a smooth surface that is easy to clean with a mop and soapy water. Bonus: these also don't hurt the way they make the horse mats. Some owners of commercial gyms find that the use of plate stack rollers on interlaced tiles causes the lock to unravel. However, I personally have not had any problem with these mats falling apart in regular use of the gym. The best gym rolls gym rubber: Floors Inc 6 mm Strong rubber rolls 8 mm Strong rubber rolls Good for: People willing to spend a little more money in the best garage at the gym My favorite features: does not have the smell of funky rubber some carpets DoCommercial Gymnasiums with most gyms rely on this type of flooring that they look and feel the color options of the stain My calls: one of the most expensive flooring options with a carpet tape of up to \$3 / square foot to stay in the location takes longer than most choices if you want floors That's more consistent, comes with more choices, and often less smell of the mats for your gym for your home, and then the rubber rolls of rubber fires around 8 mm or thicker are an excellent option. This is actually the apartment I have at my last Garage Gim Gym. Although it will not provide any other shock protection on startup mats, it moves less, less, less, Less off, and in general it has a premium look and sensation. In relation to other rubber mats, this soil is 8mm. That is a little less than the carpets of the stables of horses and tiles intertwined. However, after using them for almost a year in my personal garage gym, I have become a fan. They hold against all my gym and cardio equipment and have enough cushion to protect my soil. In addition, it is the same mats most often used in commercial gymnastics applications. With a series of spot color options, Rubber Flooring Inc rolls look very clean and professional. That said, they are expensive, and the facility requires a lot of labor. They run between \$ 2.25 and \$ 3 per square foot and come in rolls at least 15 feet, which will clearly cut. For installation, you will have to use adhesive tape to keep the carpet instead. In my opinion, it is worth the work due to eventual appearance and sensation. Better cheap home gym flats: AmazonBasics Eva Puzzle EXERCISE MAT AMAZONBASICS EVA PUZZLE EXERCISE Matoptimizes your training space with the AmazonBasics carpet Eva Puzzle Exercise Mat. There is no need to install special floors or feel limited to narrow yoga mats. The comfortable carpet makes it easy to spread and add a comfortable and cushioning layer to hard floors or an additional layer of protection with carpet floors. Best of all is that you can pick up and move or store compactly out of the way when it is finished. Puzzle style exercise mat makes a great option for any garage, basement, gym or gym. It can also be used in a playground for children, making all that asparo and fall a little less precarious. The puzzle exercise mat has a dense and high-quality EVA foam (without pro-threaded phthalates) to guarantee reliable and durable performance. The carpet protects scratching floors and dents, helps reduce noise and provides greater comfort to training routines. Whether it's a weight-lifting bench, stationary bike, mancuernas, jumping ropes, or ab roller wheels, the dense stero foamAn excellent base for everything you should have training equipment. The durable foam mat offers an optimum amount of cushioning thickness, which means less pressure on the knees, the women, elbows and back to get a greater comfort by making jump cats, abdominal, push-ups, Yoga, stretching and other floor exercises. The non-sliding grippy carpet, without slippage also provides a surface without slip for greater safety. Good for: Goat owners at home with a budget that needs to protect your floors under the heavy equipment My favorite features: a little more than a dollar. The tiles of floors of square floors are easy to connect and install, to be placed under the heavy exercise equipment, they were easily portable and easy to move. My calls: Not as durable as the rubber and not so easy to clean as resistant to resistance as the rubber floor runs quickly, if you are on a bonus budget naked and need something quick to Protect your floor, you can opt for AmazonBasics foam exercise mats interlaced. These are better for low-impact home workouts because heavy weights a
