Phonics (sometimes called synthetic phonics) is the system almost all schools use to teach children to read. Phonics teaches children the link between letters and the sounds they represent. It has its own vocabulary which can make it sound more complicated than it really is. First, your child will be taught the most straightforward letters and the sounds they make. For example, they will be taught that the letter 'm' represents an mmm sound and the letters 'oa' represent an oh sound. In phonics we use the word grapheme to talk about the letters on the page and phoneme to talk about the sounds those letters represent. Next, they will learn how sounds can be put together (blended) to make words. For example, they will learn that the sounds of the letters 'm-a-t' blend together to make the word 'mat'. Your child will then learn more sounds and will start blending them too. It can take until Year 2/Primary 3 before your child might have learned all 44 sounds in English and the many different spellings used for each sound. Then the children will really start to read! They will learn to recognise the different letters or pairs of letters (graphemes) in a word, say the separate sounds (phonemes) slowly, then put (blend) them together. For example, they will be taught that the word 'boat' can be separated out (segmented) into 'b-oa-t' which represents the sounds bbb-oh-tt. They can blend these sounds into the word 'boat'. In phonics we use the word decode to talk about breaking a word down into separate sounds and blend to talk about putting the sounds together to make a word. Deliver the joy of learning to read by using the Kiz Phonics curriculum and phonics activities. Phonics is a method of teaching children to read by combining letters to form sounds. As such, preschoolers usually begin with print awareness using the 26 letters of the alphabet. These letters can be combined to form sounds called phonemes. In a synthetic phonics approach, kids blend sounds to read full words. Reading comprehension is not an immediate priority at the early phases. Phonics teaches kids to read unfamiliar words. It is a more effective method for learning to read compared to word recognition. As learners are different, you need a varied set of resources to teach phonics phonics worksheets, phonics games, phonics flashcards, listening materials, word families activities, phonics short stories, phonics lesson videos, and PowerPoint we got you covered!
