viii Logic Pro X For Dummies

Chapter 8: Adding Media to Your Project 119

- Adding Apple Loops to Your Project 119
 - Navigating the loop browser 120
 - Adding audio loops 121
 - Adding MIDI loops 122
- Adding Prerecorded Audio to Your Project 123
 - Using the browsers to find audio files 124
 - Adding audio to your project 125
 - Adding audio from the media browser 126
 - Adding audio from the all files browser 127
- Importing Video to Your Project 128
 - Adding a movie to your project 128
 - Exploring the movie track 129
 - Creating movie scene markers 130
 - Importing audio from your movie 130

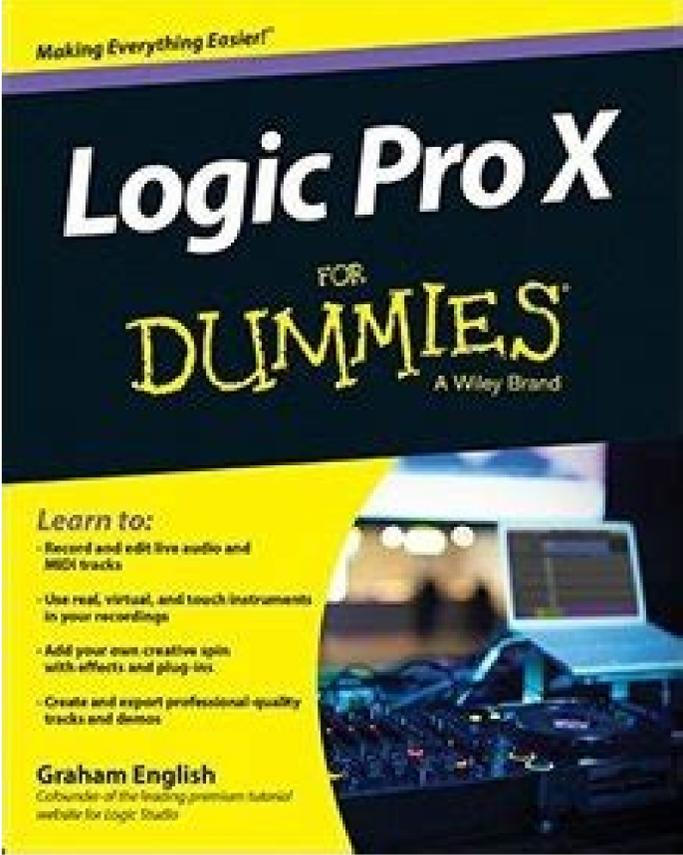

Part III: Making Music with Virtual Instruments 131

Chapter 9: Making Beats with Drummer and Ultrabeat 133

- Playing with Your Virtual Drummer 133
 - Creating a drummer track 134
 - Creating drummer regions 135
 - Choosing and directing your drummer in the editor 136
 - Selecting producer kits 137
 - Building custom kits with Drum Kit Designer 138
 - Converting drummer regions to MIDI regions 141
- Creating Beats with Ultrabeat 141
 - Exploring the Ultrabeat interface 141
 - Choosing sounds in the assignment section 143
 - Shaping sounds in the synthesizer section 144
 - Sequencing patterns in the step sequencer 149
 - Controlling patterns with MIDI 151
 - Exporting patterns into the tracks area 152

Chapter 10: Playing Virtual Vintage Instruments 153

- Taking Stock of Vintage Instruments 154
 - Loading and playing vintage instruments 154
 - Choosing vintage instrument presets 155
- Spinning Your Tonewheels with the Vintage B3 155
 - Understanding drawbars 156
 - Get the vintage vibe with vibrato/chorus and percussion 160
 - Playing with presets 161
 - Spinning the Leslie 162

aicnÁArefeR :oEŠŠAxenoC 003 :ovita There are three important things to note here: the path in the first line. There is simply foo.php, and there is no longer a query ÁA. For example, they can detect if the surfer is using a mobile browser and redirect them to a 3 version of the site that works best on smaller screens. Cookies can also contain the session ID. Host: code.tutsplus.com This is basically the host name, including the gift and the subdom. Web forms can be set to use the GET method. For example: cache-control: MAX-Age = 3600, the public means that the response can be cached by anyone. The maximum age indicates how many seconds the valid cache stops. The most common mM are received, post and hair. Cache-Control Here is the definition of W3.org: The General-Control Cache Header field is used to specify policies that must be obeyed by all cache engines along the request / response network. For example, an HTML Page (or a PHP script with HTML sa) may return this: Content-type: Text / HTML; Text Charset = UTF-8 The type and html A© the subtype of the document. Conclusion Thank you for reading. I hope this article was a good starting point for learning about HTTP headers. For example, base64 decode ('bXl1c2Vvbm15cGZcw ==') would return "MyUser: MyPass". You cannot verify that the headers have already been sent with the Headers. Sent feature (). In PHP, you cannot set cookies using the SetCookie feature () and PHP sends the appropriate HTTP headers. When you don't look at the source 3 a web page in your browser, you'll see the HTML part and not the HTTP strings, although they actually were transmitted together, as you can't see above. This can reduce size by up to 80% to save bandwidth and time. In PHP, it can be found with: \$ _Server ['http user agent']. If you Forward your web development, check out some of the popular files in CodeCanyon. Here is an example. In PHP, you can define response response headers traits ot j(tini. lrucA Aesu u uoy :deivlovn spets cisah ruof era erehT .Janoitp era sredeah eseht fo tsoM .snolöcimes yb detarapes sriap eulav=eman era esehT rab=ooF ;021qjdtv3bi7q4r534qvu5t2r=DISSSEPHH .eikooC .tseuqer lufssoccus a ot a ot enospser ni tnes si enes sutats siht ,erofeb denoiltneM sÁ KO 002 .revres ro Ineic eht yb tnes seno eht sediseb sredeah motsuc nwo ruoy dnes ot tnav uoy erehw snoitauts eb lliv ereht ,revewoH .redaeH siht sniatnoc ti emit siht tub .tseuqer PTTH rehtona sdnes resworb eht ,wodniw siht ni drowsretsap dna emanresu a ne uoy nehW .PTTH hguorht resu a etaticnehtua ot redaeH siht dnes yam etisbew A etaticnehtua-WWW .senospser PTTH ni dnuof sredeah PTTH nomnoc tsoM eht fo emos ta kool ot gniog era ew woN senospser PTTH ni sredeah PTTH ... /moc.sulpstut.edoc//:spth .noitacol .tseuqer PTTH ni dnuof sredeah TTH nomnoc tsoM eht fo emos weiver ll'ew .woN stseuqer PTTH ni sredeah PTTH ?sredaeH PTTH erA tahW .
