Some other features include the addition of elements that Weren is there before and overlapping they can add to the room of a photo. This did not get the red eye or cut your photo. However, the ability to add some extra effects is a bit clean. The only negative is very expensive with a subscription of \$ 3.99 per month or a single price tag \$ 59.99. However, we appreciate that we can buy the app entire if we want. Price: free / \$ 2.99 per month / \$ 17.99PhotDirector is a new competitor (relatively speaking) in the photo editing space on Android and this is quite good. As Fotoror, this focuses much more about manual improvements instead of filters and have access to HSL sliders, RGB color channels, white balance and more to correctly change your photos.
