You can add accounts to your phone to access your email, contacts, and calendar, and get apps from the Google Play Store. When you add a Google account, the information associated with that account is automatically synced to your phone. When you delete an account, everything associated with that account is also deleted from your phone. This includes email, contacts, and settings. Open the Settings app on your phone. Click "Passwords & Accounts". If you don't see Accounts, click Users & Accounts. In the Accounts section, click Add Account. Tap the type of account you want to add. To add your Google account, click Google. When you sign in with a Google account, email, contacts, calendar events, and other data associated with that account are automatically synced to your phone. To add another personal account, tap Personal (IMAP) or Private (POP3). You usually choose these if you are using an email program such as Microsoft Outlook or Apple Mail. Learn how to use IMAP or POP3 in Gmail. Follow the instructions on the screen. If you add accounts, you may be required to enter a phone combination, PIN, or password for security reasons. Advice: If you want to lend your phone to a friend, you can learn how to create an individual user or temporary guest instead of adding an account. Delete your Google account or other account from your phone. Open the Settings app on your phone. Click "Passwords & Accounts". If you don't see Accounts, click Users & Accounts. In the Accounts section, tap the account you want to remove. A Delete an account. Confirm by clicking Delete account OK. If this is the only Google account on your phone, you will need to enter your phone combination, PIN, or password for security reasons. Related Resources Get answers from community experts. Get your Google with a Google account (Image credit: Ara Wagoner/Android Central). Whether you use Google Play, Chromebook or Gmail, these great services all start with "and require" a Google account. Are you creating a professional account to help out at work or you want to finally move one of your kids to your account when they outgrow their Family Link profiles, setting up a Google Account is quick and easy. How to set up a Google account on any device. Open the Settings app. Scroll down and tap on Google. Click Add Account. Tap on Google. Source: Android Central. Click "Create Account". Click "For Me" if it's a personal account or "To manage my business" if it's a professional account. While you don't have to use your real name, if you want this to be your primary account, we recommend using your real name. Click next. Google requires all account users to be 13 years of age or older, and some countries require an even higher age. To have an account that allows you to pay with Google Pay or a credit card, the account holder must be over 18 years old. Select gender. If you do not want to be identified by your gender, you can choose Prefer not to speak. Click next. Source: Android Central. This username will become your Gmail address and will be used to sign in to your account. If the desired username is taken, you will be prompted to choose another username and given options. Click next. Enter a new password for your account. The password must be at least eight characters long, but luckily it can't contain numbers or special characters if you want to stick with plain old letters. Re-enter the new password in the Confirm Password field. You will be informed about how strong or weak the password you have chosen is. Source: Android Central. You will be asked if you want to add a phone number. This phone number can be used to verify your identity, sign in to your account, and help other people find you if they have your phone number. Click "Yes, I agree" to add your number, click "Skip" to log out. Source: Android Central. Google will introduce its terms of service. After browsing and reading the sections that interest you, tap I Agree. Your primary Google account is now set up and your username and password length will be displayed. Click "Next" to finish screen. Source: Android Central. Setting up a new Google account on your phone or laptop is similar, but it's easier on a desktop computer because there are fewer screens to go through. Open the Google sign-in page in your preferred web browser. Enter the name, username and account password you want to use for your account. Note that your username becomes your Gmail address, so choose something that you're comfortable typing or writing a lot. Retype the password in the Confirm Password field. This will help you enter your password correctly and disable access to the new account. Click on Continue. Credit: Ara Wagoner/Android Central (Image credit: Source: Ara Wagoner/Android Central) Once you've chosen your first username, the username field turns red. Enter a different username in the text box and select one of the suggestions under the Username field. Click next. Source: Ara Wagoner/Android Central (Image credit: Source: Ara Wagoner/Android Central) Google requires all account users to be at least 13 years old, and some countries have an even higher age limit, and to create an account using Google Pay or a credit card to pay anything, the account holder must be 18 years old. Optionally enter a phone number and/or a backup email address. They can be used to verify your identity or access your account if you forget your password, but this is optional. Click on Continue. Source: Ara Wagoner/Android Central provides your Google Account terms and privacy policy. When you have read everything, click "I agree". Source: Ara Wagoner / Android Central (Image credit: Source: Ara Wagoner / Android Central) That's it! Your new Google account is ready to use. i. H. You can send emails, compose documents and much more. Get the full power of your Google account with your Google phone. Google's Pixel lineup was stellar and expensive in its early years, but these days it's available. Vision for Android and the latest Google features without spending an arm and a leg for the best Android phones with the Pixel 4a. The Pixel 4a has the same fast upgrade schedule as the Pixel 4a 5G and 5, and the same great camera experience that absolutely blows away the competition for a \$350 mid-range phone. A Google Account is a great way to personalize your mobile device and give you instant access to everything that matters to you. It's your identity in the Google ecosystem. Creating a Google Account is quick and easy, and you can even do it right on your phone. Here are step-by-step instructions on how to set up a new Google Account on your Android mobile device. How to Create a New Google Account Creating a Google Account has benefits. Once you create one, your data will be automatically synced, including browser settings, autofill settings, and more. You can also access the Google Play Store. Let's look at some basic requirements. Requirements for creating a Google Account To create a Google Account, you must be at least 13 years old and provide certain information to verify your identity. This is necessary to ensure the security of your account. Google offers several services that require users to be at least 18 years old, including YouTube and Google Pay. You can use the Google Family Link app to create a new Google Account for your children under 13. To set up two-factor authentication for your account, you'll also need to provide your phone number for verification via text or voice call. Getting started Setting up a Google Account is easy. Here's how: Go to Settings > Accounts & Backup > Manage Accounts on your device. Scroll down and tap Add account. Select Google from the list. If pattern recognition/biometrics is enabled, you need to unlock your phone first. On the login screen, tap Create Account, then select Self from the drop-down list. You need Enter your personal details such as name, date of birth and gender. Click next. 3 images You will be asked to select a Gmail address based on your name. You can choose one of the suggested ones or create a unique address. Select Next. Set a strong password to secure your account and add your phone number to your Google account. This is useful for setting up two-factor authentication on your Google account. Select Yes, I agree. You can also add your number for security reasons only or use it for Google services. To do this, click More options and select the desired option. On the next page, read the Terms of Service and click Agree to complete the installation process. 4 images You have a Google account, now what? There are a few things you need to do to keep your account safe, functional, and private. Here are a few things to consider. Enabling 2-Step Verification To protect your privacy, you can enable 2-factor authentication (2FA) for your Google account. When you sign in to your Gmail account on a new device, Google will send you a sign-in security alert if it detects potentially malicious activity on your account. This is necessary to protect against unauthorized malware attacks and other suspicious activities. Two-factor authentication requires you to enter an additional code each time you log into your account from a new computer or device, or after a period of inactivity. To do this, follow these steps: On your device, go to Settings > Accounts & Backup > Manage Accounts. Select the newly created account from the list and click "Google Account". On the Home tab, you will be prompted to turn on 2-Step Verification. Click Turn me on. Then open your Google account in a mobile browser. Click "Start". To make sure you're receiving 2-step verification codes, you'll need to add a phone number to your Google account. Click "Next" and add your phone number. If you want to receive 2FA codes by SMS or calls. You can also click "Use another backup" to receive a set of one-time passcodes for your Google account. Enter the OTP that was sent to you and click "Next" to activate and enable 2FA. 3 Images You can also access your account using Google

Suggestions on connected devices. You can even use other available options like authentication service and security key. Review settings and app permissions. After creating a Google account, you should regularly check the "Security" tab for suspicious activity and monitor to applications. Here are some simple tips. To review your device's security settings, go to the security recommendations section and click Protect your account. Add your additional address here. To check security activity, go to Security > Recent Security Activity > Check Security Activity. To manage connected devices, go to Security > Your devices > Manage devices. You can also manage apps associated with your Google account. To do this, go to your Google Account home page > Security > Third-party apps with account access. A list of apps that have access to your account will open. If you click on one of these apps and scroll down, you'll see all the permissions that are currently available for that app. You can revoke these permissions by clicking on the app and selecting Revoke Access. 3 Images Sync your data with your Google account One of the most important things you need to do is sync your data with your Google account. This way, if you lose your device or important data, you can always restore it from another device. To do this, go to Settings > Accounts & Backup > Manage Accounts. Tap the desired Google account and select the data you want to sync, such as contacts, calendar, and email. 3 images If you haven't already done so, you can set up an additional email address and/or phone number. This is used if youyour password and you do not have access to your account or if you are blocked from it. You can enter this information in the Google Account toolbar under Personal Information > Contact Information. With a Google Account, it's easy to switch between devices. Just sign in to your existing account and you're done - app settings, preferences and more are right on your phone. Of course, most people will be busy setting up their new Android device. We hope the tips here will make your Android experience easier and more enjoyable. pleasant.
